

Mr Östen Ekengren, MSc, graduated from the Royal Institute for Technology in Stockholm in 1978. The same year he joined IVL - The Swedish Environmental Research Institute. He has been responsible for the build-up of the Environmental Technology department. He is also responsible for the business area Sustainable production and consumption. Mr Ekengren was until recently Executive Vice President for IVL. He has also been a project leader for more than hundred national and fifteen international /European Environmental Technology projects during the years. Mr Ekengren is also member of the Euroenvironment umbrella (EUREKA) where he has been active to adopt a new strategy based on the ETAP. He has been engaged in the development of the ETAP as an expert but also as a representative for EUREKA and the Swedish Ministry of Environment. He is also member in the European Water Technology platform WSSTP. He has also helped the Latvian Ministry of Economy to define how they can introduce environmental issues not as a problem but also to find the business opportunities.
